

A 501(c)(3) Not-Profit Audiology Services Organization

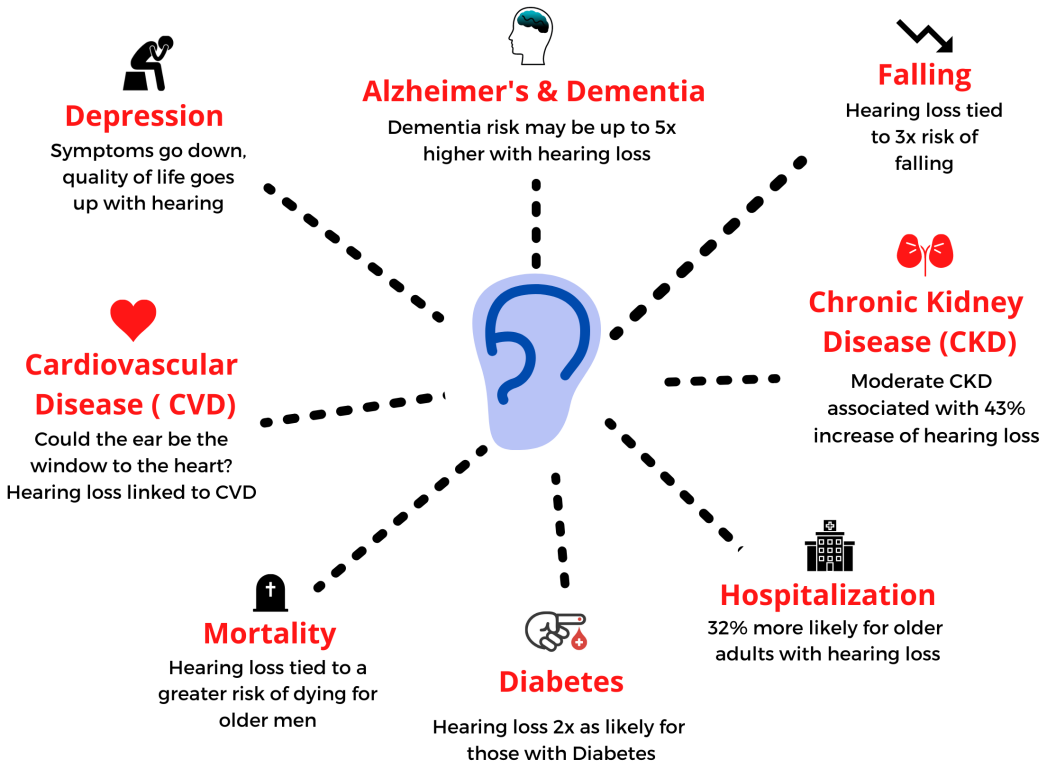

ABHF provides comprehensive hearing test and treatment to the Medicaid/low income population to help them maintain healthy, productive, lifestyles despite hearing loss.

Unless hearing is evaluated, it cannot be determined if there is hearing loss. If there is hearing loss, left untreated, it has a negative impact on the patient's overall well being.

Consider below the impact hearing loss has on depression, falling and dementia. A simple solution is to get a hearing test and rule out hearing loss as an underlying cause of your medical issues.

The "HEARING BONE'S" Connected to WHAT?

Hearing loss may signal other important health issues

Patients are seen by appointment only with a physician's referral at any one of our four locations

Physician FAX: (630) 908-5159
